

DILLIP KUMAR SABAT

Frontend Developer React.js | Angular | TypeScript

dillipsabat442@gmail.com | +91 6372750177 | linkedin.com/in/dillip-sabat-803247219

PROFESSIONAL SUMMARY

Frontend Developer with 4+ years of experience in building scalable enterprise web applications using React.js, Angular (12–16), TypeScript, JavaScript, Redux Toolkit, NgRx, Tailwind CSS, and RESTful APIs.

Experienced in developing School ERP, HRMS, Loan Processing, Document Management, and Multi-Tenant SaaS applications with expertise in JWT Authentication, RBAC, REST API Integration, Responsive UI Development, and Performance Optimization.

Passionate about building reusable, scalable, and production-ready applications while collaborating with Agile teams to deliver high-quality software.

TECHNICAL SKILLS

Frontend Technologies

React.js | Angular (12–16) | TypeScript | JavaScript (ES6+) | HTML5 | CSS3 | Tailwind CSS | Bootstrap | Angular Material React Hooks | React Router | Responsive Design | Lazy Loading

Databases

MySQL | MongoDB

State Management

Redux Toolkit | NgRx | RxJS | Context API

Authentication & Security

JWT Authentication | Role-Based Access Control (RBAC) | Protected Routes | Multi-Tenant Architecture

Backend & APIs

REST APIs | Axios | Axios Interceptors | API Integration

Tools & Technologies

Git | GitHub | Bitbucket | Jira | Vite | Postman | Figma

WORK EXPERIENCE

Walkout Tech

Software Engineer

03/2026 – Present

Project: School Management System (SSMS)

Enterprise-grade React.js-based Multi-Tenant School ERP platform designed to manage academic, administrative, examination, attendance, fee, and student lifecycle operations across multiple schools.

Key Responsibilities

- Developed **25+ enterprise modules** including Student Admission, Teacher Management, Staff Management, Attendance, Homework, Timetable, Examination, Student Performance, Fee Management, Leave Management, Reimbursements, and Bulk Upload.
- Built 40+ reusable React components, improving maintainability and development efficiency.
- Implemented React Hooks, React Router, and integrated 100+ REST APIs using Axios and Redux Toolkit.
- Implemented JWT Authentication and RBAC, improving application security across multiple enterprise modules.
- Designed responsive, pixel-perfect user interfaces from Figma using **Tailwind CSS**.
- Optimized Redux state management, reducing unnecessary API calls and improving application performance.
- Collaborated with backend teams to integrate APIs, resolve issues, and deliver high-quality production-ready features.
- Resolved production issues, improving application stability and reducing deployment defects.

Multi-Tenant Implementation

- Designed and implemented a scalable **Multi-Tenant Architecture** supporting multiple organizations through a single application codebase.
- Implemented dynamic tenant identification using subdomain-based routing.
- Configured dynamic API Base URLs based on tenant subdomains.
- Implemented Axios Interceptors for automatic **X-Tenant-ID** header injection across all API requests.
- Configured environment-specific deployments for Development, Testing, and Production.
- Ensured secure tenant isolation while improving scalability, maintainability, and deployment flexibility.

Technologies:

React.js • Redux Toolkit • JavaScript • TypeScript • Tailwind CSS • Axios • REST APIs • React Router • JWT • Vite • Git • Postman

Project: SentiDocs

Enterprise Loan Processing and Document Management platform for managing borrower information, document workflows, and mortgage processing.

Key Responsibilities

- Developed borrower and co-borrower management modules.
- Generated FNMA XML reports.
- Developed modular Angular components and integrated backend REST APIs.
- Improved application performance and participated in production support.

Technologies:

Angular 16 • TypeScript • Angular Material • NgRx • RxJS • REST APIs

Project: Shutter Management

React.js-based Tenant and Sub-Tenant Management platform for pricing management, payment processing, and business operations.

Key Responsibilities

- Developed dynamic pricing and pricing calculation modules.
- Integrated payment gateway and REST APIs.
- Built responsive React interfaces.
- Optimized application responsiveness and frontend performance.

Technologies:

React.js • Redux Toolkit • Tailwind CSS • REST APIs • Git

Sparity

Associate Software Engineer

02/2022 – 07/2024

Project: Tax Litigation Management System

Enterprise web application for managing tax litigation cases, legal documents, and case tracking workflows.

Key Responsibilities

- Developed scalable Angular web applications using reusable components.
- Integrated REST APIs.
- Built reusable UI components.
- Collaborated with cross-functional teams in an Agile Scrum environment.

Project: Seva Bharathi Blood Donation System

Web-based Blood Donation Management System for managing donor registration, blood requests, and donation records.

Key Responsibilities

- Developed Blood Donation Management System.
- Designed responsive UI.
- Integrated RESTful backend APIs.

Technologies:

Angular • TypeScript • JavaScript • HTML5 • CSS3 • Bootstrap • REST APIs

PROFESSIONAL ACHIEVEMENTS

- Developed **30+ enterprise modules** across School ERP, HRMS, Loan Processing, and Document Management applications.
- Built **40+ reusable components** and integrated **100+ REST APIs**.
- Implemented **Multi-Tenant Architecture**, JWT Authentication, Protected Routes, and RBAC.
- Optimized application performance through efficient state management and reusable architecture.
- Delivered responsive enterprise applications in Agile Scrum environments.

EDUCATION

Master of Computer Applications (MCA)

Roland Institute of Technology

2021

Bachelor of Science (Computer Science)

Science College Hinjilicut

2018
